

Please . . . don't feed waterfowl.

REGULAR FEEDING CAN CAUSE:

- Poor nutrition
- Spread of disease
- Unnatural behavior
- Pollution
- Overcrowding
- Delayed migration

Many people enjoy feeding waterfowl, but the effects of this seemingly generous act can be harmful. If you care about waterfowl, please stop feeding them . . . allow them to return to their natural habits.

Support Federal, State, and Private Organizations and their efforts to conserve waterfowl and their natural habitats.

For more information about the effects of feeding waterfowl, contact the New York State Department of Environmental Conservation office nearest you.

 **Keep wildlife wild.**
